

## *Mueller Speed Shot 1-4x24*

Mueller will be announcing the release of the Mueller 1-4x24 Speed Shot in the fall of 2011. As Mueller moves forward we are reaching farther into the Tactical market due to an ever growing demand in this industry. Mueller has decided to offer the Speed Shot in response to the numerous inquiries and the growing demand for a higher quality CQB type optic with an intermediate price range. The Speed Shot will also be a great choice for other applications as well, including shorter range hunting such as Hog hunting or Turkey hunters..

The Speed Shot will offer capped target style turrets which are reset-able to zero with the removal of 3 screws. The illumination system will offer 11 brightness settings and is operable in all lighting conditions. This illumination system in this scope is much different than a glass etched type system and will offer a much brighter option for use in normal daylight conditions, unlike standard IGR scopes where the illumination is mainly used during lower light. The reticle in the Speed Shot is a stationary dot located in the center of the view. This feature offers a wide-open view with no obstructions by crosshairs and offers the fasted target acquisition, especially when illuminated. The objective lens is recessed for safety/durability and the eye piece focus features a fast focus. With 1/2" adjustments the Speed Shot is sure to contain enough adjustment for carry handle mounts or 45 degree side mounts.

The Speed Shot is backed by the Mueller Limited Lifetime Warranty, and will be offered in the fall of 2011. You can sign up for the Mueller News letter at [MuellerOptics.com](http://MuellerOptics.com) under the "Special Offers" section to be notified when the release is active. For any questions or comments please contact us by phone or email by visiting our contacts page. We thank our customers for their support and always appreciate your business.

Thank You,  
Mueller Optics
